

Hello;

I am writing to state my opposition to the NABs petition 04-160. I am a paying subscriber to XM-satelite radio and do not appreciate special intrests trying to control the content of what I am able to receive. I subscribe to XM radio because I value the content as well as being able to get local trafic and weather on demand. I do not believe that traffic and weather reports belong to the NAB and resent the fact that they are trying to use the FCC to control their assumed monopoly on such content.

Again, as a customer of subscription satellite radio, I hope the FCC puts a stop to the NABs blatant attempt to control the content of what I am paying to receive.
